

Dear Steve,

Qualification Ref: 600/6284/8 – Level 3 NVQ Diploma in Plumbing and Heating (Gas Fired Water and Central Heating Appliances)

Hull College fully support the qualification identified above.

In addition to our apprenticeship programme, it is estimated that this qualification will be delivered by our college to around 4 learners over the next academic year. The numbers anticipated should continue from year to year.

The qualification is a good progression route from the Level 2 NVQ Diploma in Plumbing and Heating and provides learners with a good understanding of the plumbing skills and knowledge required within the plumbing industry. This can lead to future employment and recognition with a suitable trade body such as the Chartered Institute of Plumbing and Heating Engineers and ENG Tech registration.

Kind Regards

Barry Spick (Tutor for Plumbing and Gas)
