

Dear Steve,

Qualification Ref: 600/6284/8 – Level 3 NVQ Diploma in Plumbing and Heating (Gas Fired Water and Central Heating Appliances)

Oxford Energy Academy fully support the qualification identified above.

In addition to our apprenticeship programme, it is estimated that this qualification will be delivered by our college to around 10 learners over the next academic year. The numbers anticipated should continue from year to year.

The qualification will provide learners with a good understanding of the plumbing skills and knowledge required to progress to the Level 3 Plumbing Foundation or ideally the Level 3 NVQ Diploma in Plumbing and Heating (Environmental Technology or Gas pathways) which could eventually lead to an apprenticeship and/or full time employment.

Kind Regards

Dave Bendell

Director

Oxford Energy Academy
