Dear Garry

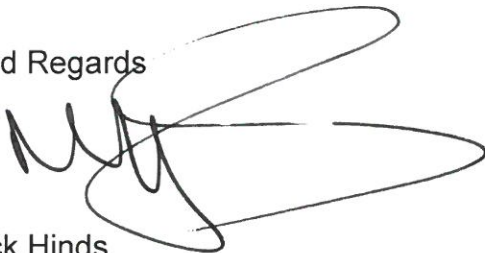

Stephenson College - letter of support for BPEC Level 3 Diploma in Plumbing and Domestic Heating

I am pleased to be able to confirm our support for the above qualification.

The Level 3 Diploma in Plumbing and Domestic Heating is a qualification which we are pleased to be able to offer to our apprentices. The qualification will provide our apprentices with an excellent understanding of the plumbing knowledge, skills and behaviours required to achieve the qualification and will allow them to progress to End-point Assessment. The completion of the apprenticeship will allow our apprentices to be industry recognised as L3 Plumber and Domestic Heating Technicians.

It is estimated that this qualification will be delivered by our college to around 36 new apprentices per academic year. The numbers anticipated should continue from year to year for the 4 years of the new apprenticeship standard recommended length of stay.

Kind Regards

Mick Hinds
