

BPEC can confirm its qualifications that fall within scope of the Vocational Contingency Regulatory Framework (VCRF) fall into either Category A or B2. Further detail for each qualification and category can be found below and following the link to the Ofqual Summer 2021 Qualification Explainer Tool

<https://analytics.ofqual.gov.uk/apps/AllQualifications/summer2021tool/>

Category A Qualification

Learners will be expected to sit exams and/or assessments for this qualification

Where qualifications test occupational or professional knowledge and/or skills, or proficiency in a skill area, learners must be assessed on these areas so that they can be effective and safe within the workplace.

Some of the exams or assessments that learners will take may be adapted so that they can take place in line with public health guidance.

Some exams or assessments may have to be delayed if it is not possible to adapt them in a way that complies with public health guidance without undermining confidence in the qualification.

Category B2 Qualification

Learners will be expected to sit exams or assessments for this qualification, but if they cannot safely access an assessment they may be able to receive a result based on a Teacher Assessed Grade

Exams and assessments will continue for these qualifications and learners will sit them when they are ready to do so.

If learners are ready but unable to sit an exam or assessment, either in person in a school, college or training provider in line with public health guidance, or remotely, then they may be able to receive a result based on a Teacher Assessed Grade.

Where exams and assessments continue, they may take place as normal or there may be some changes to the assessments.

Issuing of Results

BPEC will issue the results for TAGs to centres on Thursday 12th August 2021. Normal timescales apply for the issuing of results for Category A qualifications, and qualifications where TAGs have not been applied. Centres are reminded of their obligation to ensure the submission of learner results is timely.
